c
Positive Regulation of Cholesterol Efflux
Regulation of Amyloid Precursor Protein Catabolic Process
Response to Amyloid−Beta
Chemical Synaptic Transmission, Postsynaptic
Tau Protein Binding
Negative Regulation of Gene Expression, Epigenetic
Histone H3 Methyltransferase Activity
Proteasome−mediated Ubiquitin−Dependent Protein Catabolic Process
Chromatin Remodeling
Negative Regulation of Gene Expression
Potassium Ion Transmembrane Transport
Cell Junction Organization
Regulation of TORC1 Signaling
Cellular Response to Lipid
Metal Ion Transport
Transmitter−gated Monoatomic Ion Channel Activity
Positive Regulation of Cellular Component Organization
Synapse Assembly
Monoatomic Cation Transmembrane Transport
Response to Amyloid−Beta
Dendritic Spine Organization
Postsynaptic Density Assembly
Response to Amyloid−Beta
Memory
Chemical Synaptic Transmission
Cardiac Conduction System Development
Aortic Valve Development
Artery Morphogenesis
Blood Vessel Morphogenesis
Regulation of DNA Repair
